Is teaching an art or a science? It’s a little of both. There is artistry in the way teachers connect with students and foster their understanding. At the same time, there is a science to teaching and learning, an evidence base on which to build our approaches to developing students' knowledge, skills, and competencies.

Nov 14, 2017 - But there’s also a science behind the art of storytelling. Here’s how it works, starting with the science of the non-story: We’ve all listened to (and suffered through) long PowerPoint presentations made up of bullet points – bullet points that may be meaningful to the presenter, but lack the same punch for the audience.
